Getting Started with HashiCorp Consul
Objective 9 - Lab Guide

1. **Generate a new gossip encryption key**
   a. **$ consul keygen**

2. **Install (distribute) the new gossip encryption key across the cluster**
   a. **$ consul keyring -install <new_gossip_key>**

3. **Validate you can see the key on the second server and that it has been distributed throughout the cluster**
   a. **$ consul keyring list**

4. **Configure Consul to use the newly installed key**
   a. **$ consul keyring -use <new_gossip_key>**

5. **List the existing keys**
   a. **$ consul keyring list**

6. **Remove (delete) the old key from the keyring so we only have a single key for gossip encryption**
   a. **$ consul keyring -remove <old_gossip_key>**

7. **List the existing keys to validate the original key is now deleted**
   a. **$ consul keyring list**
