Getting Started with HashiCorp Consul

Objective 3 - Lab Guide

1. **Download the service configuration file that includes a health check**
   a. https://github.com/btkrausen/hashicorp/blob/master/consul/service-with-health.json

2. **Inspect/view the file**
   a. $ sudo vi service-with-health.json

3. **Register the service with health check**
   a. $ consul services register service-with-health.json

4. **Stop the Apache web service to validate that the health check fails as expected**
   a. $ sudo systemctl stop httpd

5. **Start the Apache web service to validate the health check now passes**
   a. $ sudo systemctl start httpd
